

Cust. ID	Age	Capital Gain	Savings	Attrite
1	41 old	low	poor	yes
2	35 young	high	poor	no
3	26 young	low	great	yes
4	37 old	low	great	yes
5	32 young	high	poor	no
6	40 old	low	poor	yes
7	30 young	high	poor	no
8	21 young	low	poor	no
9	28 young	high	poor	no
10	27 young	low	great	yes

Suppose age is discretized at 36 (as shown). As usual, ignore the Cust. ID attribute.

Show the PRISM process for making the rule for Attrite = yes.
